Education

SRM Institute of Science and Technology, Tiruchirappalli 2023 - 2027

B Tech (Bachelor of Technology)_Computer Science Engineering (CSE) (8.91

CGPA)

Sri Chaitanya Junior College, Chilakaluripet

2021 - 2023

Intermediate_MPC (88.8%)

Sri Chaitanya Techno School, Chilakaluripet

2020 - 2021

Secondary School Of Certificate (100.0%)

Project

Jobby App

[project1_link](#)

Technologies used : React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

Implemented Jobby App where users can log in and can see a list of jobs with search by Job title, filters based on Salary range and Employment type, etc

- Implemented different pages like Login, Home, Jobs, Job item details using React components, props, state, lists, event handlers, form inputs.
- Authenticating by taking username, password and doing login post HTTP API Call.
- Persisted user login state by keeping jwt token in client storage, Sending it in headers of further API calls to authorize the user.
- Implemented different routes for Login, Home, Jobs, Job item details pages by using React Router components Route, Switch, Link.
- Implemented filters and search text by sending them as query parameters to jobs API calls.

- Redirecting to the login page if the user tries to open Home, Jobs, Job item details routes which need authentication by implementing protected Route.

Nxt Watch

[project2_link](#)

Technologies used : React JS, JavaScript, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication.

Developed the Nxt Watch platform, a YouTube-inspired application where users can access various video categories, such as Trending, Gaming, and Saved videos, and search for specific content while customising the visual theme.

- Crafted a responsive UI with React components for pages like Login, Home, Trending, Gaming, and Saved videos, utilising event handlers and form inputs.
- Established user authentication through username/password input and HTTP API calls, maintaining login state with JWT tokens and local storage.
- Enabled secure navigation using React Router components for protected routes, redirecting unauthenticated users to the login page.

IPL Dashboard

[project3_link](#)

Technologies used : React JS, Routing, REST API Calls, CSS, Bootstrap

Designed a one-stop destination for IPL team and match information.

- Navigated effortlessly with React Router, displaying team information and matches with dynamic REST API calls.
- Accounted for invalid routes with a 404 page.

Crop Recommendation System

[project4_link](#)

Technologies used : Python

A Machine Learning model which had built upon the basis of the BiLSTM and LSTM, and used predict which crop is better for the Particular conditions based on the soil, weather properties and simple dashboard which is built for easy usage for the farmers and it will explain why only this crop with an explanation with XAI.

Cisco Networking basics

Successfully completed Cisco Networking Academy's Networking Basics course, developing a strong understanding of networking fundamentals and real-world networking concepts.

AWS Prompt Engineer

Learned how chatbots worked and working various LLMs and basic steps for giving prompts

Certificates
